

Quality equipment, **innovative solutions.**

CAMCORP dust collection and pneumatic conveying solutions can be standard or modified to fit any application. With nearly three centuries of combined experience, our experts have tackled every application and realize there isn't a one-size solution fits all. Not only do we design, build, and support reliable air pollution control and pneumatic conveying equipment and systems, we also build trust in all that we do. Keeping the air clean and bulk material handling efficient is no small task. It takes collaboration and team work. You can trust CAMCORP to be your partner in supporting a clean-air environment.

PRODUCTS

- Dust collectors
- Pneumatic conveying
- Bulk material handling equipment
- Components and replacement parts

REVERSE AIR BAGHOUSE

BULK MATERIAL HANDLING SYSTEMS

PULSE JET BAGHOUSE

PNEUMATIC CONVEYING SYSTEMS

REPLACEMENT PARTS

CYCLONES

CARTRIDGE COLLECTOR

INDUSTRIES SERVED

- Agriculture
- Automotive
- Cement
- Chemical
- Coal
- Ethanol
- Feed
- Fly Ash
- Food Processing
- Foundry
- Grain & Corn
- Iron & Metals
- Milling & Baking
- Mining & Minerals
- Medical/Pharma
- Plastic
- Pulp & Paper
- Recycling
- Rice
- Rock Products
- Seed
- Soybean
- Sunflower
- Woodworking
- Many More

Dust Collectors

When it comes to air pollution control at your facility, you need to know your options. CAMCORP equipment is designed to be standard or modified to fit any application.

- Reverse air baghouse
- Pulse jet baghouse
- Medium pressure collectors
- Filter receivers
- Bin vent filters
- Cyclones
- Cartridge collectors
- Vertical cartridge collectors
- Central dust collection systems

Components and Replacement Parts

When customers contact CAMCORP, they immediately speak to a dedicated spare parts expert because they do more than simply take orders. Customers often take advantage of the team's wide-reaching industry and application experience to provide recommendations on the best replacement parts and components for ANY dust collector or pneumatic conveying manufacturer's equipment.

- Filter bags and cages
- Filter cartridges
- Airlocks and airlock rebuilds
- Pipe and tube
- Elbows and fittings
- Valves and repair kits
- Blowers
- Couplings
- And more!

Pneumatic Conveying

CAMCORP customers appreciate our comprehensive know-how in all areas of dry bulk material handling systems; the initial receipt, storage, silo discharging and conveying. Our expert engineers design cost-effective solutions for reliable conveying for gentle and low-wear effect on the product.

- Truck or railcar unload systems to bulk storage silos
- Storage silos including dust collection and reclaim systems
- Pneumatic transfer systems from silos to terminal use points
- Sifting and metering of ingredients
- Weighing/scaling of ingredients
- Dehumidification and conditioning of air stream
- Minor ingredient systems including loss-in-weight batching
- Batch management systems
- Process controls including PLC and motor starter systems

Together for a better world

Scheuch North America, a division of Scheuch Group facilitates and supports shared resources between Scheuch Group and its two acquired North American brands, CAMCORP and Schust Engineering. Utilizing the expert engineers and field technicians at these two respected brands within the United States, Canada and Mexico, Scheuch North America can transfer leading European expertise in air pollution control and pneumatic conveying technology.

CAMCORP designs its dust collection and bulk material handling solutions with flexibility in mind.

With nearly two centuries of combined experience, CAMCORP experts have tackled every application and realize there isn't a one size solution fits all.

Not only does CAMCORP design, build, and support reliable air pollution control and bulk material handling equipment, they also build trust in all that they do.
