DUST COLLECTION & BULK MATERIAL HANDLING

STAINLESS STEEL CAPABILITIES

FOOD, PHARMACEUTICAL AND CHEMICAL

CAMCORP understands that there are many variations to sanitary design principles when it comes to fabricating equipment.

In-house manufacturing capabilities allow experts to fabricate equipment to meet most food, pharmaceutical and chemical grade requirements when required or specified.

WELD SPECIFICATIONS

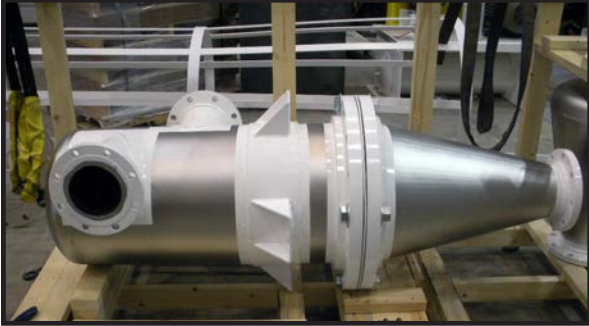

CAMCORP has fabricated food-grade equipment from carbon steel coated with a food grade epoxy. Welders also have experience with stainless steel sheets (#4 finish) and continuous welds that are ground smooth and polished to a 320-grit finish.

It is important to know your plant's sanitary design requirements and specifications when requesting equipment. While there are cost differences between carbon and stainless steel finishes, the levels of quality between these two extremes provide customers with many options to select from.

CAMCORP weld specifications are listed in the chart below.

MATERIALS OF CONSTRUCTION	COMPONENTS	WELD FINISHES	MISCELLANEOUS
<ul style="list-style-type: none"> Carbon steel 304 stainless steel (2B sheet) 304 stainless steel (#4 finish) 316L stainless steel (2B sheet) 316L stainless steel finish (#4 finish) 	<ul style="list-style-type: none"> Painted with industrial enamel Painted with food grade epoxy Painted with industrial epoxy Painted with STEEL-IT paint system 	<ul style="list-style-type: none"> Continuously welded Cleaned of smoke and spatter Ground smooth but not polished Ground and polished to 80 grit finish Ground and polished to 120 grit finish Ground and polished to 150 grit finish Ground and polished to 180 grit finish Ground and polished to 240 grit finish Ground and polished to 320 grit finish 	<ul style="list-style-type: none"> Glass bead blast Passivation of welds Electropolish

PROJECT PORTFOLIO

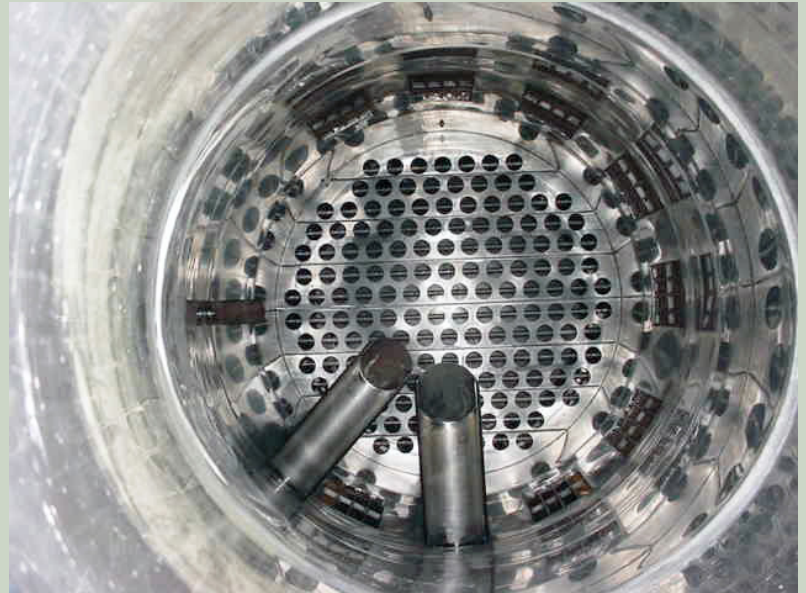

CYCLONE

- 304-2B Stainless Steel Product Contact
- Carbon Steel External Contact
- 36-Grit Polished Product Contact Welds
- External Welds Cleaned of Smoke

FILTER/RECEIVER

- 304L-2B Stainless Steel Product Contact
- 304L-2B Stainless Steel Gas & External Contact
- 120-Grit Polished Welds on Product Contact
- 36-Grit Polished Welds on Gas Contact
- External Welds Cleaned of Smoke

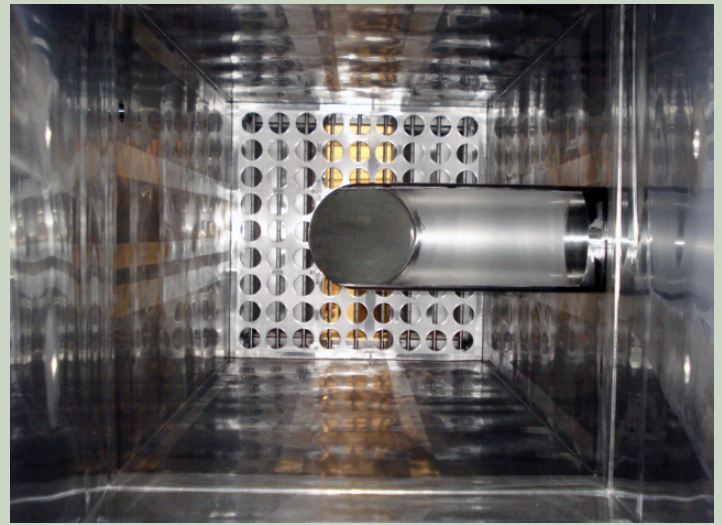

SCALE HOPPERS

- 304-2B Stainless Steel Product Contact
- Carbon Steel Non-Product Contact
- 36-Grit Polished Product Contact Welds
- External Welds Cleaned of Smoke

INSULATED COLLECTOR

- 304-2B Stainless Steel Product Contact
- 304-2B Stainless Steel Gas Contact
- Carbon Steel External Stiffeners
- 304-2B Stainless Steel External Skin

- 150-Grit Polished Welds on Product Contact
- 36-Grit Polished Welds on Gas Contact
- External Welds on Skin Cleaned of Smoke

FILTER/RECEIVER

- 304-2B Stainless Steel Product Contact
- Carbon Steel Gas & External Contact
- 80-Grit Polished Welds on Product Contact
- External Welds Cleaned of Smoke

FEATURES & OPTIONS

- Stainless steel sheets
- Polished welds and sheets
- Food grade closed cell gaskets
- Ledge-less design
- Free of cracks & crevices
- Food grade filter media
- Clean-in-place (CIP) design
- Passivation of welds
- Glass bead blast finish
- Easy access for maintenance
- Closed box tube or pipe supports
- Plug style access ports
- Quick clean/change features
- Dished head roof with davit arm
- Tri-clamp style connections
- Full access cleanable design
- Stainless steel hardware
