## FOR IMMEDIATE RELEASE

### CAMCORP LAUNCHES NEW WEBSITE

**Lenexa, Kansas, June 3, 2019** -- CAMCORP, a manufacturer of reliable air pollution control and pneumatic conveying equipment, is proud to announce the launch of its newly redesigned website at <https://www.camcorpinc.com/>. The new site features a modern design, improved functionality, and easy access to essential information to help manufacturer representatives, design engineers, and prospects make well-informed decisions about their dust collection or bulk material handling project.

"We are thrilled to debut the new CAMCORP website to our reps, customers, and potential new customers who are looking for dust collection and pneumatic conveying solutions," says Keith Horton, National Sales Director. "This website redesign truly ties together all of our products and services into one place and allows visitors to access our information in multiple ways."

CAMCORP's new website will be updated on a regular basis with product news, technical information, as well as corporate milestones. Website visitors are encouraged to explore the new website and sign up for CAMCORP's monthly eNews.

#### About CAMCORP

CAMCORP dust collection and bulk material handling solutions can be standard or modified to fit any application. With nearly three centuries of combined experience, our experts have tackled every application and realize there isn't a one size solution fits all. Passionate, hard-working employees and in-house manufacturing experts take pride in and stand by their work. Not only do we design, build, and support reliable air pollution control and bulk material handling equipment, we also build trust in all that we do. Air filtration and pneumatic conveying needs are ever-changing. At CAMCORP, we promise to continue to find new, affordable solutions for your clean air and bulk material handling challenges. CAMCORP becoming a member of the Scheuch Group is just one way to honor that promise. North American customers have local access to highly-respected European air pollution control and bulk material handling system technology.
