FOR IMMEDIATE RELEASE

CAMCORP TO SHOWCASE STAINLESS STEEL FILTER RECEIVER AT SNAXPO20

Lenexa, Kansas, March 4, 2020 --- CAMCORP designs a wide range of pneumatic conveying and bulk material handling systems to automate manual processes in the baking and snack foods industries. As SNAXPO20 exhibitors in Charlotte, NC, they will showcase pneumatic conveying solutions for applications where automation of dry bulk ingredients provides a high level of repeatability and accuracy.

“CAMCORP customers appreciate our comprehensive know how in all areas of dry bulk material handling systems,” says Tom Leach, Pneumatic Conveying Sales Manager. “Our solutions include vacuum and pressure pneumatic conveying systems, minor ingredient automation, dust collection, and dehumidification systems.”

In addition to sharing their pneumatic conveying engineering experience, experts will also be available at booth #1129 to discuss other CAMCORP solutions such as dust collection. Few companies can provide dust collection and pneumatic conveying integrated together to improve production efficiency, provide quality control, and reduce labor costs. Attendees that stop by CAMCORP booth #1129 will be able to see inside a stainless-steel filter receiver commonly found in snack food and bakery applications. After opening the door to look inside, attendees can see bag and cartridge configurations and how the filter receiver is designed, installed, and ready for operation.

CAMCORP will also be showing a recently launched pneumatic conveying animation that will take attendees through a typical snack food application while showcasing CAMCORP design capabilities. “This animation is going to show that CAMCORP is a systems company capable of solving a wide array of baking processing applications,” says Leach.

CAMCORP designs the ideal environment for pressure transfer of bulk ingredients such as flour, sugar, or any dry bulk ingredient. With nearly three centuries of combined experience, CAMCORP experts have tackled every application and realize there isn't a one-size solution fits all.

###

About CAMCORP

CAMCORP dust collection and bulk material handling solutions can be standard or modified to fit any application. With nearly three centuries of combined experience, our experts have tackled every application and realize there isn't a one size solution fits all. Passionate, hard-working employees and in-house manufacturing experts take pride in and stand by their work. Not only do we design, build, and support reliable air pollution control and bulk material handling equipment, we also build trust in all that we do. Air filtration and pneumatic conveying needs are ever-changing. At CAMCORP, we promise to continue to find new, affordable solutions for your clean air and bulk material handling challenges. CAMCORP becoming a member of the Scheuch Group is just one way to honor that promise. North American customers have local access to highly-respected European air pollution control and bulk material handling system technology. Keeping the air clean and bulk material handling efficient is no small task. It takes collaboration and team work. You can trust CAMCORP and Scheuch to be your partners in supporting a clean-air environment. To learn more visit <https://www.camcorpinc.com/> for more information.
