FOR IMMEDIATE RELEASE

**CAMCORP TO EXHIBIT AT THE INTERNATIONAL POWDER AND BULK SOLIDS
CONFERENCE AND EXHIBITION AUGUST 24-26, 2021**

Lenexa, Kansas, July 12, 2021 --- CAMCORP designs a wide range of dust collection and pneumatic conveying systems that can be standard or modified to fit any application. As exhibitors in Rosemont, IL, they will showcase dust collection and pneumatic conveying solutions for applications where processing and automating dry bulk ingredients reduces costly maintenance and provides a high level of repeatability and accuracy.

“CAMCORP customers appreciate our comprehensive know how in all areas of dry bulk material handling systems,” says Tom Leach, Pneumatic Conveying Sales Manager. “Our solutions include vacuum and pressure pneumatic conveying systems, minor ingredient automation, dust collection, and dehumidification systems.”

In addition to sharing their pneumatic conveying engineering experience, experts will also be available at booth #2637 to discuss other CAMCORP solutions such as dust collection. Few companies can provide dust collection and pneumatic conveying integrated together to improve production efficiency, provide quality control, and reduce labor costs. “Customers continue to work with CAMCORP because they recognize that a poorly designed and maintained air pollution control system has negative implications on their plant and processes,” says Jim Weber, Vice President of Sales & Marketing. “CAMCORP experts have tackled every application and realize there isn’t a one-size solution fits all.”

###

About CAMCORP

CAMCORP dust collection and bulk material handling solutions can be standard or modified to fit any application. With nearly three centuries of combined experience, our experts have tackled every application and realize there isn’t a one size solution fits all. Passionate, hard-working employees and in-house manufacturing experts take pride in and stand by their work. Not only do we design, build, and support reliable air pollution control and bulk material handling equipment, we also build trust in all that we do. Air filtration and pneumatic conveying needs are ever-changing. At CAMCORP, we promise to continue to find

new, affordable solutions for your clean air and bulk material handling challenges. CAMCORP becoming a member of the Scheuch Group is just one way to honor that promise. North American customers have local access to highly respected European air pollution control and bulk material handling system technology. Keeping the air clean and bulk material handling efficient is no small task. It takes collaboration and teamwork. You can trust CAMCORP and Scheuch to be your partners in supporting a clean-air environment. To learn more visit <https://www.camcorpinc.com/> for more information.
